Why the Netherlands?

- The Netherlands offers one of the best infrastructures in the world - it tops the rankings in terms of connectivity, offers ITS using high-speed broadband and has 98% household coverage and national 4G coverage
- Access to the complete testing chain
- Strong public-private cooperation
- Gateway to Europe for legislative changes
- Engaged customers: 80% of Dutch people have a smartphone and the logistics sector is involved in the platooning challenge.

How does the Smart Mobility Embassy work?

Through the Smart Mobility Embassy we are offering our expertise as one of the global leaders in Smart Mobility, with the aims of encouraging international parties to carry out testing in the Netherlands and exporting Dutch knowledge. The Smart Mobility Embassy functions as an intermediary, bringing parties who need Dutch expertise and capabilities in the area of Smart Mobility together with Dutch parties who can offer these services.
